FOTO and Chart Links Announce Plans for Data Exchange

Convenience for clients and clinical efficiency drives vendor relationship

KNOXVILLE, Ky. February 6, 2008 — Focus On Therapeutic Outcomes, Inc. (FOTO), the nation's largest independent outpatient database and reporting service for physical rehabilitation providers and Chart Links, LLC, a leading provider of workflow management software for medical rehabilitation, have signed an agreement to develop a data exchange between FOTO's Patient Inquiry® (PI®) software and Chart Links rehabilitation software.

“Chart Links is expanding its outcomes and analytics offerings to aid patient care, and ensure compliance requirements,” says Ron Miller, M.D., Chart Links President and Chief Medical Officer. “Our partnership with FOTO offers providers a convenient way to get at functional and demographic data that will support decisions to maximize their clinical efficiency.”

“Our first goal is to eliminate any duplicate data entry. Once that is complete, we will investigate other ways that we might benefit our mutual clients.” says FOTO CEO Ben E. Johnston, Jr., PT.

About FOTO, Inc.

FOTO has been gathering functional outcomes data since 1992 and is currently installed in approximately 1,800 clinics in the United States and Israel. FOTO's 24 month comparative data set includes approximately 180,000 completed patient episodes from orthopedic, neurologic, industrial, and pain management programs. FOTO's PI® Software was recommended by CMS in Transmittal 63. www.fotoinc.com

About Chart Links, LLC

For 12 years, Chart Links has developed rehabilitation software that automates workflow for referrals, insurance authorizations, cross-discipline scheduling, documentation, charges, and more. Chart Links allows medical rehabilitation facilities to be more efficient and to provide a higher quality of care by delivering results in the areas of compliance, outcomes, analytics and revenue. www.chartlinks.com
